TOTI PUTRA PRATAMA

Project Engineer & Data Analyst | Telecommunications Infrastructure

Kudus, Central Java, Indonesia • Totiputra08@gmail.com • +62 898-5903-141 • linkedin.com/in/toti-putra-669490249 • portofolio-toti.vercel.app

PROFESSIONAL SUMMARY

Results-driven **Project Engineer and Data Analyst** with 4+ years of cross-functional experience in telecommunications infrastructure and operations automation. Proven track record managing Telkomsel projects worth up to **IDR 40 billion**, achieving up to 30% cost efficiency while delivering 85% of projects ahead of schedule. Specialized in BTS engineering, Huawei iMAE/MML integration, and designing end-to-end operational software platforms (LTE Interference Radar, RET Audit Engine, RAN Quality Scorecards, and WhatsApp field bots). Adept in Power BI, MySQL, Node.js, Python, and workflow automation.

PROFESSIONAL EXPERIENCE

Technical Support – Radio Access Assurance | **PT Telekomunikasi Selular (Telkomsel)** February 2025 – Present

- **Engineered Automated Telecom Operations Platform:** Architected and deployed production automation tools connecting field technicians with Linux server microservices via WhatsApp, reducing manual intervention by 80%.
- **LTE Interference Radar & 24-Hr Spatial Heatmap:** Developed an interactive spatial and temporal interference intelligence dashboard tracking 254+ BTS sites across 4 LTE bands (L900, L1800, L2100, L2300), cutting noise localization from days to minutes.
- **Automated RET (Remote Electrical Tilt) Assessment:** Built an automated antenna tilt and physical port audit engine across 6 regional NOPs, synchronizing live with Google Sheets to prevent cell overshooting without manual tower climbing.
- **RAN Quality Scorecard & Dual-Axis Engine:** Created an automated KPI analytics engine computing rolling 7-day Quality Scores and dual-axis 24-hour correlation charts (Payload vs Accessibility/Retainability) rendered in <3 seconds.
- **Huawei MML Regex Engine & Balmon Regulatory Generator:** Automated parsing of Huawei raw MML logs (DSP RETPORT, LST BRD, LST RRU) for 1,400+ sites, generating official Kominfo complaint dossiers in <15 seconds with 100% compliance.
- **BTS Security & Vandalism Monitoring Dashboard:** Analyzed 597 tower theft incidents (IDR 12.1 Billion financial exposure) using geospatial clustering to guide preventive patrol allocations.
- **Network Administration & SPMS:** Managed Change Requests (CRQ) and end-to-end inbound/outbound material logistics in alignment with Site Project Management System (SPMS) targets.

Project Engineer – ATP Jabotabek INNER | **PT Infrastruktur Telekomunikasi Indonesia (TELKOMINFRA)** May 2023 – July 2024

- Managed project budgets of up to **IDR 40 billion**, achieving up to 30% cost efficiency through strategic vendor allocation and procurement audits.
- Led Telkomsel turnkey network rollout programs from site engineering through execution to on-time, on-budget completion.
- Supervised field operational teams in implementing Telkomsel Blacksite Batch #1, #2, #3, and Re-engineering deployments.
- Streamlined administrative approval workflows and KPI governance, delivering projects **85% ahead of schedule**.

ATP Coordinator – Jabotabek INNER & OUTER | **PT Infrastruktur Telekomunikasi Indonesia (TELKOMINFRA)** February 2023 – May 2023

- Governed eATP (electronic Acceptance Test Procedure) compliance with Telkomsel technical standards, boosting regional acceptance rate by **70%**.
- Compiled executive progress reports and strategic engineering recommendations for regional deployment directors.

Document Control Officer | **PT Radhika Patangga Jagadhita** 2021 – 2022

- Closed telecom rollout programs with a **99% documentation accuracy rate**, meeting stringent client audit standards.
- Administered complete engineering dossiers across Telkomsel Blacksite Batch #1, Batch #2, and Re-engineering packages.

KEY MEASURABLE ACHIEVEMENTS

Ranked #1 Leading Partner for Project Closure
Awarded top partner ranking for fastest and most accurate technical project sign-offs (November 2021).

85% Ahead-of-Schedule Delivery
Consistently delivered complex network rollout milestones well ahead of targeted deployment SLA.

30% Cost Efficiency on IDR 40B Portfolio
Achieved strategic operational savings through optimized resource allocation and logistics control.

80% Administrative Workflow Automation
Built custom automated bots and scripts eliminating repetitive reporting and document generation.

+70% eATP Regional Achievement Rate

Executive Real-Time Analytics Dashboards

Accelerated asset standard compliance across Jabotabek regional operational territories.

Developed interactive Power BI & web monitoring engines replacing manual weekly spreadsheets.

TECHNICAL SKILLS & COMPETENCIES

Data & Analytics	Power BI, MySQL, Python, JavaScript, Leaflet.js, Chart.js, Data Modeling, KPI Correlation Analysis
Automation & Systems	Node.js, Express, Puppeteer (Headless Chromium), N8N, Power Automate, REST APIs, WhatsApp Baileys
Telecom Infrastructure	Huawei iMAE Integration, MML Log Parsing (DSP RETPORT, LST RRU), RET Antenna Audit, CRQ, SPMS, eATP
Project Management	Budget Governance (IDR 40B+), Vendor & Subcontractor SLA, Risk Mitigation, Asset Protection, Inventory Logistics
Design & Productivity	AutoCAD, Microsoft Visio, Microsoft Excel (Advanced Modeling), Google Workspace API, Linux (Ubuntu/Debian)
Languages	Bahasa Indonesia (Native), English (Working Professional)

EDUCATION

Bachelor of Informatics Engineering (S1) — Universitas Esa Unggul, Bekasi — Semester 8 (Final Stage)
